Sanitisers are needed to destroy organisms that are harmful to people. These organisms are introduced into the pool by a wide variety of sources including bathers, animals and insects, rain, dust, grass and leaves. These pathogens, which include bacteria, algae, viruses, etc, and various other contaminants that are continuously being introduced into the swimming pool increases the chlorine demand of the water.

aquaGUARD offers a wide range of granular and liquid chlorine based, as well as non-chlorine based, pool and spa sanitiser options that are cost effective, simple to use and very effective in maintaining a healthy pool.

AquaFresh 700

Features

- Low residue, non-stabilised granular chlorine sanitiser
- Less clouding
- Suitable for regular sanitising & oxidising (shocking)
- Suitable for all types of pools

Pack Size	Carton Quantity	Product Code	Bar Code
2 kg	6 x 2 kg	PC0026	9319737 800205
4 kg	4 x 4 kg	PC0027	9319737 900400
10 kg	1 x 10 kg	PC0028	9319737 001008
40 kg	1 x 40 kg	PC0327	9319737 250154

Formulation

- 700 g/kg available Chlorine present as Calcium Hypochlorite

Application Rates

- Initial Application : 280 g per 10,000 L of water or 320 g per 10,000 L of unstabilised pool water
- Daily Maintenance : 40 g per 10,000 L of water or 80 g per 10,000 L of unstabilised pool water
- Superchlorination : 160 g per 10,000 L of water

Tips

- Apply with pump and filter ON
- ENSURE pool has 30 – 50 ppm isocyanurate when AquaFresh 700 is used as the regular pool sanitiser
- 120 g AquaFresh 700 per 10,000 L of water increases Calcium Hardness approximately 8 ppm
- Approximately 160 mL of Balance FIVE, or 220 g of Balance FOUR, per 1 kg of AquaFresh 700 applied to neutralise the increase in pH

AquaFresh 1250

Features

- Fast acting, non-stabilised liquid chlorine
- Liquid formulation – no residue & will not cloud water
- Suitable for regular sanitising & oxidising (shocking)
- Compatible with auto dosing equipment

Pack Size	Carton Quantity	Product Code	Bar Code
15 L	1 x 15 L	PC0036	9319737 601505
20 L	1 x 20 L	PC0154	9319737 905016

Formulation

- 125 g/L available Chlorine present as Sodium Hypochlorite

Application Rates

- Initial Application : 1.4 L per 10,000 L of water or 1.6 L per 10,000 L of unstabilised pool water
- Daily Maintenance : 200 mL per 10,000 L of water or 400 mL per 10,000 L of unstabilised pool water
- Superchlorination : 800 mL per 10,000 L of water

Tips

- Apply with pump and filter ON
- ENSURE pool has 30 – 50 ppm isocyanurate when AquaFresh 1250 is used as the regular pool sanitiser

AquaFresh IMPACT

Features

- Fast acting, completely soluble, stabilised granular chlorine sanitiser
- No pre-dissolving required & will not cloud water
- Low impact on pH
- Non-Dangerous Good classification : Safer to store & transport than most granular chlorine

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	10 x 1 kg	PC0152	9319737 015210
2 kg	6 x 2 kg	PC0033	9319737 006003
4 kg	4 x 4 kg	PC0034	9319737 004009
10 kg	1 x 10 kg	PC0035	9319737 010000

Formulation

- 560 g/kg available Chlorine present as Sodium Dichloroisocyanurate (SDIC)

Application Rates

- Initial Application : 100 – 170 g per 10,000 L of water
- Daily Maintenance : 10 – 25 g per 10,000 L of water

Tips

- Apply with pump and filter ON
- IDEAL sanitiser for small above ground pools and pools without skimmer

AquaFresh ONCE-A-WEEK TABS

Features

- Completely soluble 200 g tablet formulation
- Long lasting designed to dissolve slowly
- Stabilised to reduce chlorine loss due to UV light

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	6 x 1 kg	PC0023	9319737 200104
2 kg	6 x 2 kg	PC0024	9319737 300200
10 kg	1 x 10 kg	PC0025	9319737 401006

Formulation

- 890 g/kg available Chlorine present as Trichloroisocyanuric Acid

Application Rates

- 1 – 2 AquaFresh POWER TABS tablet per 20,000 L of water

Tips

- Use with floating chlorine dispenser or automatic chlorine feeders
- Once dispenser filled with AquaFresh POWER TABS adjust according to manufacturer's directions to maintain free chlorine residual level of 1.5 – 3.0 ppm
- Monitor stabiliser levels : DO NOT exceed concentration of 100 ppm isocyanurate

Oxidation is the process of chemically removing swimmer wastes & other organic contaminants in the swimming pool water. The nitrogen-based contaminants react with free available chlorine to form chloramines, which have an unpleasant "chlorine odour". Regular oxidation removes chloramines & keeps the water sparkling & clear.

***aquaGUARD** offers a wide range of cost-effective & simple to use chlorine, as well as non-chlorine, pool oxidiser shock treatment options to maintain a clear, sparkling pool.*

Recharge

Features

- Non-chlorine sanitiser & oxidiser
- Completely soluble & fast-dissolving
- Keeps water sparkling & fresh
- Eliminates chloramines & musty odours
- Maximises efficiency of chlorine & bromine sanitisers

Pack Size	Carton Quantity	Product Code	Bar Code
450 g	12 x 450 g	PC0042	9319737 200050
25 kg		PC0001	9319737 250131

Formulation

- Potassium Peroxymonopersulphate

Application Rates

- 450 g bag treats up to 40,000 L pool

Tips

- Apply with pump and filter ON
- Compatible with ioniser & ozonator sanitising systems
- IDEAL for use where stabiliser is not permitted
- Bathers can re-enter the water within 30 minutes

Refresh MAX

Features

- Stabilised chlorine oxidiser (shock treatment)
- Easy to use convenient pre-measured bags
- Restores water sparkle & freshness
- Eliminates chloramines & musty odours
- Helps kill resistant algae

Pack Size	Carton Quantity	Product Code	Bar Code
12 x 450 g	2 x 12 x 450 g	PC0041	9319737 100053

Formulation

- 890 g/kg available Chlorine present as Trichloroisocyanuric Acid

Application Rates

- 450 g bag treats up to 30,000 L pool

Tips

- Slowly apply 1 bag of Refresh MAX per 30,000 L water into the skimmer, with pump and filter ON
- NEVER broadcast directly into pool, especially pools with bleachable surfaces
- DO NOT swim until free residual chlorine level is below 5.0 ppm
- Apply weekly as maintenance or as required, especially after heavy bather loads or heavy rainfall

Taking care of a swimming pool involves more than just keeping the water healthy. The water must also be properly balanced – not too acidic or too alkaline. Water that is not properly balanced can affect the effectiveness of the sanitiser, bather comfort, water clarity, as well as increase the risk of damage to pool surfaces & equipment.

Water balance is determined by such factors as pH, Total Alkalinity, Calcium Hardness & water temperature.

Balance ONE

Features

- Raises Total Alkalinity
- Protects pH against effects of factors such as rain, bather load & other chemicals
- Prevents corrosion of equipment & damage to pool surfaces

Pack Size	Carton Quantity	Product Code	Bar Code
2 kg	8 x 2 kg	PC0046	9319737 270022
4 kg	4 x 4 kg	PC0047	9319737 800403
10 kg	1 x 10 kg	PC0048	9319737 901001
20 kg	1 x 20 kg	PC0334	9319737 033405

Formulation

- 1000 g/kg Sodium Hydrogen Carbonate (*Sodium Bicarbonate*)

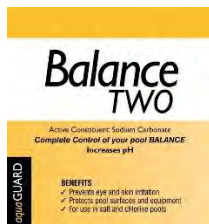

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations

Tips

- If large quantities (more than 500 g per 10,000 L of water) required, divide dosage into 3 applications
- Broadcast into pool with pump and filter ON
- 180 g per 10,000 L of water will raise Total Alkalinity by approximately 10 ppm

Balance TWO

Features

- Raises pH
- Prevents eye irritation
- Improves performance of all *aquaGUARD* Health products
- Prevents corrosion of equipment & etching of pool surfaces

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	12 x 1 kg	PC0049	9319737 000100
2 kg	6 x 2 kg	PC0050	9319737 100206
25 kg	1 x 25 kg	PC0010	9319737 250086

Formulation

- 980 g/kg Sodium Carbonate (*Dense Soda Ash*)

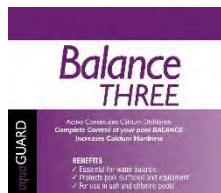

Application Rates

- Determine dosage required from Alkali Demand test or as prescribed by *aquaBIZ* recommendations

Tips

- Ensure correct balance of Total Alkalinity before applying Balance TWO
- Broadcast directly into pool with pump and filter ON
- DO NOT apply more than 250 g per 10,000 L of water at any one time
- Circulate for at least 2 hours between treatments and retest pH
- Application of other products may affect pH, so retest pH after application and adjust accordingly

Balance THREE

Features

- Raises Calcium Hardness
- Prevents corrosion of equipment & etching of pool surfaces

Pack Size	Carton Quantity	Product Code	Bar Code
2 kg	6 x 2 kg	PC0051	9319737 320024
4 kg	4 x 4 kg	PC0052	9319737 330047
10 kg	1 x 10 kg	PC0053	9319737 170100
20 kg	1 x 20 kg	PC0335	9319737 033504

Formulation

- 740 g/kg Calcium Dichloride

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations

Tips

- Divide required dosage into 3 equal amounts and circulate for 30 minutes between treatments
- DO NOT pre-dissolve : Broadcast directly into pool with pump and filter ON
- 100 g per 10,000 L water will increase Calcium Hardness by 10

Balance FOUR

Features

- Reduces pH slowly and Total Alkalinity
- Prevents corrosion of pool equipment & damage to pool surfaces
- Reduces the risk of scale formation & cloudy water
- Improves performance of all *aquaGUARD* Health products
- Safer handling and storage than liquid acid

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	6 x 1 kg	PC0043	9319737 400153
3 kg	6 x 3 kg	PC0044	9319737 500303
14 kg	1 x 14 kg	PC0045	9319737 601406
25 kg	1 x 25 kg	PC0012	9319737 191020

Formulation

- 980 g/kg Sodium Hydrogen Sulphate (*Sodium Bisulphate*)

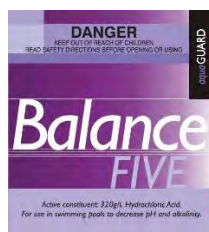

Application Rates

- Determine dosage required from Acid Demand test or as prescribed by *aquaBIZ* recommendations.

Tips

- Ensure Total Alkalinity is correctly balanced before treatment
- DO NOT apply more than 250 g per 10,000 L of water at any one time
- Apply with pump and filter ON
- DO NOT apply near metal fittings
- Test for Total Alkalinity and adjust as necessary if experiencing difficulty balancing pH
- When lowering Total Alkalinity, Balance FOUR should be added slowly to minimise effect on pH

Balance FIVE

Features

- Maintains correct pH for optimum chlorine sanitiser efficiency
- Prevents corrosion of equipment & damage to pool surfaces
- Reduces risks of cloudy water & scale formation

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0054	9319737 400108
5 L	4 x 5 L	PC0055	9319737 500501
15 L	1 x 15 L	PC0056	9319737 360150
20 L	1 x 20 L	PC0155	9319737 090224

Formulation

- 325 g/L Hydrogen Chloride (*Hydrochloric Acid or Muriatic Acid*)

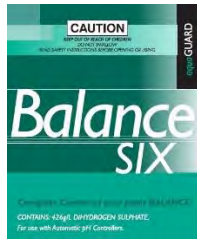

Application Rates

- Determine dosage required from Acid Demand test or as prescribed by *aquaBIZ* recommendations.
- 30 mL per 10,000 L of water per decimal point of pH correction

Tips

- Apply with pump and filter ON
- Test for Total Alkalinity and adjust as necessary if experiencing difficulty balancing pH

Balance SIX

Features

- Non-fuming liquid pool acid
- Ideal for use with auto-dosing pH controllers
- Reduces pH
- Prevents corrosion of equipment & damage to pool surfaces
- Reduces the risk of scale formation & cloudy water
- Maintains correct pH for optimum chlorine sanitiser efficiency

Pack Size	Carton Quantity	Product Code	Bar Code
15 L	1 x 15 L	PC0058	9319737 801509

Formulation

- 426 g/L Dihydrogen Sulphate (*Sulphuric Acid*)

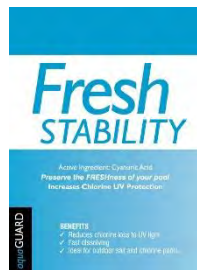

Application Rates

- Determine dosage required from Acid Demand test or as prescribed by *aquaBIZ* recommendations.
- 30 mL per 10,000 L of water per decimal point of pH correction

Tips

- Apply with pump and filter ON
- Test for Total Alkalinity and adjust as necessary if experiencing difficulty balancing pH

Fresh Stability

Features

- Helps reduce residual chlorine loss from UV light exposure
- Reduces chlorine consumption

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	16 x 1 kg	PC0037	9319737 700109
2 kg	8 x 2 kg	PC0038	9319737 180024
20 kg	1 x 20 kg	PC0336	9319737 033603

Formulation

- 980 g/kg Isocyanuric Acid

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations

Tips

- 100 g per 10,000 L water will increase stabiliser level by 10 ppm
- DO NOT exceed concentration of 100 ppm of isocyanurate
- DO NOT allow product to sit on bottom of bleachable pool surfaces
- For use with chlorine systems only (not suitable for use with bromine tablets)

Fresh Stability Tabs

Features

- Helps reduce residual chlorine loss from UV light exposure
- Reduces chlorine consumption
- Fast dissolving formulation

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	12 x 1 kg	PC0306	9319737 180496
5 x 200 g tablets			
1.6 kg	12 x 1.6 kg	PC0039	9319737 180420
8 x 200 g tablets			
50 kg	1 x 50 kg	PC0018	9319737 431751

Formulation

- 980 g/kg Isocyanuric Acid

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations

Tips

- 100 g per 10,000 L water will increase stabiliser level by 10 ppm
- DO NOT exceed concentration of 100 ppm of isocyanurate
- DO NOT allow product to sit on bottom of bleachable pool surfaces
- For use with chlorine systems only (not suitable for use with bromine tablets)

NOTE: Hydrochloric Acid 14% Solution available in 20L (PC0303)

Conventional approach to controlling algae in swimming pools relied upon maintaining an adequate sanitiser residual level & a correct water balance. It is vital to control algae for health, safety & aesthetic reasons because algae infestation problems are both expensive & frustrating to correct.

Algae spores are either already present in the water, introduced by wind, or are attached to other debris which can contaminate the pool. Algae species most commonly found in swimming pools are the green, black, mustard & pink algae. Each have developed their own unique defence mechanisms.

aquaGUARD has products formulated to kill, prevent & control algae infestations. Use them to avoid cloudy water, increased chlorine demand & clogged filters.

Clear ALGICIDE

Features

- Non-copper, fast working broad spectrum algaecide
- Effective against all common types of algae
- Non-foaming & non-staining formulation
- Minimal impact on pH
- Ideal for use in pools with attached spas, waterfalls or fountains

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0090	9319737 003606

Formulation

- 300 g/L Polyquat (Poly [oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride])

Application Rates

- Initial Application : 100 mL per 10,000 L of water
- Preventative Maintenance : 140 mL per 10,000 L of water monthly
- Light algae growth : 150 mL per 10,000 L of water
- Heavy algae growth : 225 mL per 10,000 L of water

Tips

- Vacuum leaves and other floating debris and backwash filter before treatment
- Pour around edges of pool with pump ON and circulate for 2 – 4 hours after treatment
- Thoroughly brush pools surfaces with appropriate pool brushes
- Vacuum dead algae and repeat treatment as required
- Assist in recovery of algae infested pools

Clear CONTROL

Features

- Fast working, copper-based broad spectrum algaecide
- Effective against all common types of algae
- Minimal impact on pH
- Long-lasting algae prevention

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0068	9319737 500129
20 L	1 x 20 L	PC0248	9319737 500204

Formulation

- 32 g/L Copper present as Copper Sulphate Pentahydrate complex

Application Rates

- Initial Application : 200 mL per 10,000 L of water
- Preventative Maintenance : 50 mL per 10,000 L of water monthly

Tips

- Vacuum leaves and other floating debris and backwash filter before treatment
- Pour around edges of pool with pump ON and circulate for 2 – 4 hours after treatment
- Thoroughly brush pools surfaces with appropriate pool brushes
- Vacuum dead algae and repeat treatment as required
- Assist in recovery of algae infested pools

Clear GUARD

Features

- Quaternary ammonium based broad spectrum algaecide
- Non-staining formulation
- Negligible impact on pH
- Effective as duck deterrent and floating insect killer

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0069	9319737 460010
20 L	1 x 20 L	PC0194	9319737 460201

Formulation

- 250 g/L of Alkyl Benzyl Dimethyl Ammonium Chloride (*Benzalkonium Chloride*)

Application Rates

- Initial Application : 180 mL per 10,000 L of water
- Preventative Maintenance : 120 mL per 10,000 L of water monthly

Tips

- Apply 30 mL per 10,000 L of water after heavy rain
- Vacation Maintenance : 60 mL per 10,000 L of water per week

Clear HIBERNATE

Features

- Fast working, copper-based broad spectrum algaecide
- Effective against all common types of algae
- Long-lasting algae winter treatment : up to 3 months protection
- Minimal impact on pH
- Non-foaming formulation

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	6 x 1 L	PC0079	9319737 900103

Formulation

- 60 g/L of Copper present as Copper Sulphate Pentahydrate complex

Application Rates

- Winter Application : 100 mL per 10,000 L of water

Tips

- ENSURE adequate circulation during winter months, minimum 2 – 4 hours daily

Clear TWO

Features

- Fast working, copper-based broad spectrum algaecide
- Effective against all common types of algae
- Effective in recovery of algae infested pools
- Minimal impact on pH
- Long-lasting algae prevention

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0072	9319737 470125

Formulation

- 60 g/L of Copper present as Copper Sulphate Pentahydrate complex

Application Rates

- Initial Application : 100 mL per 10,000 L of water
- Preventative Maintenance : 50 mL per 10,000 L of water monthly

Tips

- Vacuum leaves and other floating debris and backwash filter before treatment
- Pour around edges of pool with pump ON and circulate for 2 – 4 hours after treatment
- Thoroughly brush pools surfaces with appropriate pool brushes
- Vacuum dead algae and repeat treatment as required
- Assist in recovery of algae infested pools

aquaGUARD offers a range of specialty chemical products for both preventative and problem-solving concerns. Specialty chemical solutions that will deal with most pool water, pool surface or pool equipment problems that are cost effective, simple to use and very effective in maintaining clear, sparkling and comfortable water.

Avert

Features

- Prevents scale build up from high calcium levels
- Helps remove some scale build up
- Prevents staining & discolouration of water from metals in the water
- Helps avert costly repair bills from damage to equipment and pool surfaces
- Long lasting and easy to apply

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0085	9319737 210127

Formulation

- Hydroxyethylidene Diphosphonic Acid

Application Rates

- Monthly Maintenance : 100 mL per 10,000 L of water directly to pool with pump ON

Tips

- Maintenance applications recommended in hard water areas and where source water has excessive metals
- Where metals present, apply 50 mL per 10,000 L water for every 1 ppm of metals

Crystal CLEAR TAB

Features

- Maintains crystal clear water
- Single dose skimmer application formulation
- Clears cloudy water fast
- Improves filter performance
- Safe for use with all pool & filter types

Pack Size	Carton Quantity	Product Code	Bar Code
40 x 75 g	2 x 40 x 75 g	PC0091	9319737 400214
75 g	160 x 75 g	PC0092	9319737 400313

Formulation

- Alumina Salt tablet

Application Rates

- 1 tablet per 50,000 L of water

Tips

- Optimum efficiency in pool water pH 7.4 – 7.6
- Backwash & rinse filter before applying tablet to skimmer basket. Once water is crystal clear, apply weekly or after every backwash
- It is normal for Crystal CLEAR TAB to initially cause filter pressure to rise within a few hours of dosing. Always refer to filter manufacturer's operation manual for specified filter pressure limits.

Crystal CLARITY

Features

- Heavy duty liquid clarifier
- Maximises filter efficiency
- Quickly restores water to sparkling condition
- Safe for use with all pool & filter types

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0062	9319737 410121
20 L	1 x 20 L	PC0207	9319737 018006

Formulation

- Polymeric Cationic Coagulant

Application Rates

- Initial Application : 160 mL per 10,000 L of water
- Monthly Maintenance : 80 mL per 10,000 L of water

Tips

- Allow to circulate for at least 8 hours after treatment
- ALWAYS monitor filter pressure and backwash filter as per manufacturers' instructions

CRYSTAL EXPRESS

Features

- Fast acting flocculant
- Makes water clear & sparkling
- Removes dead algae & other suspended debris
- Excellent problem solver for extremely cloudy pools

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0065	9319737 240018
20 L	1 x 20 L	PC0191	9319737 002500

Formulation

- Polymeric Cationic Coagulant

Application Rates

- 200 mL per 10,000 L of water

Tips

- Top up pool with fresh water to above skimmer level before treatment
- Allow to RECIRCULATE for at least 1 hour after treatment before turning pump and filter OFF
- Allow up to 24 hours to settle before vacuuming to WASTE

CRYSTAL QUICK

Features

- Formulated to restores cloudy, murky water to clear and healthy looking quickly
- Improves filtration

Pack Size	Carton Quantity	Product Code	Bar Code
2 kg	6 x 2 kg	PC0066	9319737 400207
20 kg	1 x 20 kg	IC0044	9319737 250017

Formulation

- 1000 g/kg Aluminium Sulphate (Alum)

Application Rates

- 200 g per 10,000 L of water

Tips

- Allow up to 24 hours to settle
- Avoid excessive agitation of sediments
- Vacuum gently to WASTE

Deluxe Filter Cleaner

Features

- Effectively eliminates unsightly black spot in fibreglass swimming pools

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	6 x 1 L	PC0233	9319737 086354

Formulation

- Sulphamic Acid & Surfactants

Application Rates

- Dilute 1 L in 10 L of water

Tips

- Backwash the filter before treatment. Application rate dosage is recommended for a 600 mm diameter sand filter
- Add mixture into directly into the sand filter. Alternatively, turn the filter to backwash then add the mixture via the pump lint pot. Turn pump off as soon as all the mixture has been added. Allow to stand for 24 hours before back washing filter.
- Larger filters may require larger volume of mixture migrating to the surface
- Recommended to clean filters at the start & at the end of the swimming season.

Eliminate

Features

- Effectively eliminates unsightly black spot in fibreglass swimming pools

Pack Size	Carton Quantity	Product Code	Bar Code
2 kg	6 x 2 kg	PC0087	9319737 530027
25 kg	1 x 25 kg	PC0015	9319737 250031

Formulation

- 995 g/kg Organic Acid complex

Application Rates

- 1 kg per 30,000 L of water

Tips

- DO NOT conduct treatment during the swimming season
- Black spot osmosis problems in fibreglass pools are the result of oxidation of the cobalt in the fibreglass substrate migrating to the surface
- Maintaining good pH and Total Alkalinity balance will aid reducing recurrence of problem

Enhance

Features

- Multifunctional granular product
- Soft, silky water for added swimmer comfort
- Reduced skin and eye irritation
- Increases water clarity
- Improves performance of all *aqua*GUARD Health products

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	8 x 1 kg	PC0088	9319737 540019
10 kg	1 x 10 kg	PC0089	9319737 350014

Formulation

- 950 g/kg Sodium Tetraborate

Application Rates

- Initial Application : Add 1.5 kg per 10,000 L of water directly to pool

Tips

- Recommended level of Enhance is 25 – 30 ppm

Remove XP

Features

- Formulated to effectively and efficiently remove dissolved phosphates in pools & spas

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	6 x 1 L	PC0309	9319737 001503
2.5 L	6 x 2.5 L	PC0307	9319737 290020
20 L	1 x 20 L	PC0310	9319737 002005

Formulation

- 200 g/L Lanthanum Chloride

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations.
- Treatment : 500 mL per 50,000 L pool, every 2 – 3 days, or 1 L for pools more than 50,000 L capacity
- Monthly Maintenance : 500 mL per 50,000 L of water

Tips

- Retest water once treatment completed

Remove TWO

Features

- Removes excessively high residual chlorine, bromine and hydrogen peroxide
- Negligible impact on pH
- Can be used with all types of pools and spas
- Shorter down time due to high residual chlorine, bromine or hydrogen peroxide levels

Pack Size	Carton Quantity	Product Code	Bar Code
500 g	6 x 500 g	PC0081	9319737 310056

Formulation

- 980 g/kg Sodium Thiosulphate

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations

Tips

- 10 or 18 ??? g per 10,000 L of water will remove approximately 1 ppm of chlorine or 2.25 ppm of bromine
- DO NOT apply more than the required dose to avoid creating a chlorine demand

Salt Cell Cleaner

Features

- Removes excessively high residual chlorine, bromine and hydrogen peroxide
- Negligible impact on pH
- Can be used with all types of pools and spas
- Shorter down time due to high residual chlorine, bromine or hydrogen peroxide levels

Pack Size	Carton Quantity	Product Code	Bar Code
1 L	12 x 1 L	PC0264	9319737 534015
5 L	4 x 5 L	PC0265	9319737 534152

Formulation

- Inhibited Hydrochloric Acid

Application Rates

- Add 1 part Salt Cell Cleaner to 10 parts water

Tips

- Dilute 1 part Salt Cell Cleaner in 10 parts water in a clean plastic bucket (Do NOT use a metal bucket).
- ALWAYS add product to water – NEVER water to product.
- Immerse salt chlorinator cell in the solution for 10 – 15 minutes. Heavy scaling of cell may require further treatment. NEVER use any implement to try to dislodge the scale on the cell.
- Rinse well before reinstalling the cell.

aquaGUARD offers both chlorine and bromine spa sanitiser options that are cost effective, simple to use and very effective in maintaining a healthy pool.

Pure

Features

- Ideal for indoor spas and spas attached to pools
- Less odour and slower dissolving than chlorine tablets
- Chlorine content assists in regenerating bromine
- Ideal for use with automatic feeders or floater dispensers

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	6 x 1 kg	PC0094	9319737 700017
10 kg	1 x 10 kg	PC0311	9319737 602557

Formulation

- 650 g/kg available Bromine & 280 g/kg available Chlorine present as Bromo Chloro Dimethyl Hydantoin (BCDMH)

Application Rates

- Fill spa bromine dispenser with Pure tablets and adjust according to manufacturer's directions to maintain total bromine residual level of 4.0 – 6.0 ppm

Tips

- Residential spas : Drain and refill approximately every 60 days, depending upon use
- Commercial spas : Refer to local Health Regulations

AquaFresh IMPACT

Features

- Fast acting, completely soluble, stabilised granular chlorine sanitiser
- No pre-dissolving required & will not cloud water
- Low impact on pH
- Non-Dangerous Good classification : Safer to store & transport than most granular chlorine

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	10 x 1 kg	PC0152	9319737 015210

Formulation

- 560 g/kg available Chlorine present as Sodium Dichloroisocyanurate (SDIC)

Application Rates

- Initial Shock Treatment : 10 – 17 g per 1,000 L of water
- Daily Maintenance : 5 g per 1,000 L of water

Tips

- Apply with pump and filter ON
- Stabiliser levels must be tested fortnightly
- Once stabiliser levels reach 100 mg/L, DO NOT use this product until stabiliser levels fall below that level. Instead use an unstabilised chlorine product to maintain free chlorine levels

The control of bather and other wastes is critical to ensuring an enjoyable spa experience. These organic and inorganic contaminants will accumulate and combine with chlorine (or bromine) to cause odours and skin irritation, making the water uncomfortable for bathers. Regular oxidation will remove these wastes and prevent the formation of these irritating combine chlorine products.

aquaGUARD offers both chlorine-based and non-chlorine spa oxidiser options that are cost effective, simple to use and very effective in producing sparkling, healthy and comfortable water.

Excite

Features

- Non-chlorine sanitiser & oxidiser
- Completely soluble & fast-dissolving
- Keeps water sparkling & fresh
- Eliminates chloramines & musty odours
- Maximises efficiency of chlorine & bromine sanitisers

Pack Size	Carton Quantity	Product Code	Bar Code
750 g	12 x 750 g	PC0098	9319737 300125

Formulation

- Potassium Peroxymonopersulphate

Application Rates

- Initial Application : 40 g per 1,000 L of water directly to spa
- Weekly Maintenance : 25 g per 1,000 L (as required)

Tips

- Apply with pump ON and aeration OFF
- Compatible with both chlorinated or brominated spas
- Compatible with ioniser & ozonator sanitising systems
- Bathers can re-enter the water within 30 minutes
- Excite can increase total bromine residual levels in brominated spas. DO NOT use spa until total bromine residual level is under 8.0 ppm

AquaFresh IMPACT

Features

- Fast acting, completely soluble, stabilised granular chlorine sanitiser & oxidiser
- No pre-dissolving required & will not cloud water
- Low impact on pH
- Non-Dangerous Good classification : Safer to store & transport than most granular chlorine

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	10 x 1 kg	PC0152	9319737 015210

Formulation

- 560 g/kg available Chlorine present as Sodium Dichloroisocyanurate (SDIC)

Application Rates

- Initial Shock Treatment : 10 – 17 g per 1,000 L of water
- Daily Maintenance : 5 g per 1,000 L of water

Tips

- Apply with pump and filter ON
- Stabiliser levels must be tested fortnightly
- Once stabiliser levels reach 100 mg/L, DO NOT use this product until stabiliser levels fall below that level. Instead use an unstabilised chlorine product to maintain free chlorine levels

Like swimming pools spa water must also be properly balanced. Similarly, water that is not properly balanced can affect the effectiveness of the sanitiser, bather comfort, water clarity, as well as increase the risk of damage to spa surfaces and equipment.

The nature of spa operating environment, small volume, hot water and aeration, means that chemical reactions tend to occur more rapidly than in swimming pools. As such maintaining a proper water balance is critical.

Equalise COMPLETE

Features

- Increases Total Alkalinity
- Raises pH gently
- Provide initial bromine boost
- IDEAL for spa start up or fresh refill

Pack Size	Carton Quantity	Product Code	Bar Code
1 kg	12 x 1 kg	PC0100	9319737 001701
2 kg	6 x 2 kg	PC0312	9319737 002708

Formulation

- 16 g/kg available Bromine & 7 g/kg available Chlorine present as Bromo Chloro Dimethyl Hydantoin (BCDMH)
- Alkaline salts

Application Rates

- Initial Application : 400 g per 1,000 L of spa water
- Weekly Maintenance : 25 g per 1,000 L of spa water

Tips

- IDEAL for spa start up
- Pre-dissolve 400 g in 2 L of water and pour directly into spa water with pump ON and aeration OFF
- DO NOT add any other chemicals to spa until residual Bromine level drops to 2.0 ppm

Equalise 100

Features

- Raises Total Alkalinity
- Protects pH against effects of factors such as rain, bather load & other chemicals
- Prevents corrosion & damage of spa equipment & surface

Pack Size	Carton Quantity	Product Code	Bar Code
750 g	12 x 750 g	PC0104	9319737 490178

Formulation

- 1000 g/kg Sodium Hydrogen Carbonate (*Sodium Bicarbonate*)

Application Rates

- Determine dosage required from water analysis or as prescribed by aquaBIZ recommendations

Tips

- Broadcast into spa with pump ON and aeration OFF
- 18 g per 1,000 L of water will raise Total Alkalinity by approximately 10 ppm

Equalise 200

Features

- Raises pH
- Prevents corrosion & damage of spa equipment & surface
- Prevents skin and eye irritation
- Improves performance of all *aquaGUARD* Health products

Pack Size	Carton Quantity	Product Code	Bar Code
750 g	6 x 750 g	PC0105	9319737 500020

Formulation

- 980 g/kg Sodium Carbonate (*Dense Soda Ash*)

Application Rates

- Determine dosage required from Alkali Demand test or as prescribed by *aquaBIZ* recommendations.

Tips

- Ensure correct balance of Total Alkalinity before applying Equalise 200
- Broadcast into spa with pump ON and aeration OFF
- DO NOT apply more than 30 g per 1,000 L water at any one time
- Test for Total Alkalinity and adjust as necessary if experiencing difficulty balancing pH

Equalise 300

Features

- Raises Calcium Hardness
- Prevents corrosion of spa equipment & etching of surface

Pack Size	Carton Quantity	Product Code	Bar Code
750 g	12 x 750 g	PC0108	9319737 510012

Formulation

- 740 g/kg Calcium Dichloride

Application Rates

- Determine dosage required from water analysis or as prescribed by *aquaBIZ* recommendations

Tips

- Divide required dosage into 3 equal amounts and circulate for 30 minutes between treatments
- Broadcast directly into spa with pump ON and aeration OFF
- 10 g per 1,000 L water will increase Calcium Hardness by 10
- DO NOT use in spas where BioGuard® SPA Perfect Balance is being used
- DO NOT pre-dissolve

Equalise 400

Features

- Reduces pH slowly
- Prevents corrosion of spa equipment & surface
- Reduces the risk of scale formation & cloudy water
- Safer handling than liquid acid
- Improves performance of all *aquaGUARD* Health products

Pack Size	Carton Quantity	Product Code	Bar Code
750 g	12 x 750 g	PC0102	9319737 480018

Formulation

- 980 g/kg Sodium Bisulphite

Application Rates

- Determine dosage required from Acid Demand test or as prescribed by *aquaBIZ* recommendations.

Tips

- Apply with pump ON and aeration OFF
- Test for Total Alkalinity and adjust as necessary if experiencing difficulty balancing pH
- When lowering Total Alkalinity, Equalise should be added slowly to minimise effect on pH

Cleaning is an important part of spa maintenance. It is more than just the draining and refilling the spa. Cleaning involves treating the spa plumbing and associated equipment, washing and polishing the spa shell.

aquaGUARD has formulated a range of specialty products to make the cleaning process quick and easy, as well as enhancing your spa experience.

Embrace

Features

- Conditions water to be more comfortable to bathe
- Gentle on hair, less skin & eye irritation
- Increases water clarity
- Improves performance of all aquaGUARD Health products

Pack Size	Carton Quantity	Product Code	Bar Code
750 g	6 x 750 g	PC0109	9319737 530058

Formulation

- 950 g/kg Sodium Tetraborate

Application Rates

- Initial Application : Add 200 g per 1,000 L of water directly to spa
- Weekly Maintenance : 30 g per 1,000 L of water

Tips

- Maintenance applications of Embrace needed if spa is not refilled frequently

Inhibit

Features

- Prevents scale build up from high calcium levels or hard water
- Helps remove some scale build up and fresh metal stains
- Prevents staining & discolouration of water from metals in the water

Pack Size	Carton Quantity	Product Code	Bar Code
500 mL	12 x 500 mL	PC0111	9319737 540057

Formulation

- Hydroxyethylidene Diphosphonic Acid

Application Rates

- 50 ml per 1,000 L of water directly to spa with pump ON and aeration OFF
- Weekly Maintenance : 30 ml per 1,000 L water

Tips

- Circulate for at least 4 hours after treatment
- DO NOT apply when chlorine level exceeds 5.0 ppm
- Maintenance dose should be applied to spas in areas where excessive hardness or metals cause frequent scale formation or staining
- If metals are present, clean filter with Disperse before treatment

Lustre

Features

- Heavy duty liquid clarifier
- Improves filter efficiency to clear cloudy water
- Combines small particles into larger ones to assist in filtration

Pack Size	Carton Quantity	Product Code	Bar Code
500 mL	12 x 500 mL	PC0114	9319737 550054

Formulation

- Cationic Polymer

Application Rates

- 50 ml per 1,000 L of water directly to spa with pump and filter ON and aeration OFF
- Weekly Maintenance : 25 ml per 1,000 L water

Tips

- Chemically clean filter with Disperse before treatment
- Circulate for at least 2 hours after treatment
- Repeat treatment after 24 hours, as required
- Always monitor filter pressure & backwash filter as per manufacturers' instructions

Shine

Features

- Heavy duty non-abrasive pool and spa surface cleaner
- Restores the shine to pool and spa surfaces
- Helps remove fresh stains, grease and dirt

Pack Size	Carton Quantity	Product Code	Bar Code
500 mL	6 x 500 mL	PC0059	9319737 310056

Formulation

- 33 g/L Alkaline Salts and 10 g/L Potassium Hydroxide

Application

- Spray directly onto the surface to be cleaned
- Scrub surfaces & rinse thoroughly with clean water
- For heavy stains, allow to soak on stain for 5 – 10 minutes

Tips

- Vinyl surfaces, apply with a damp sponge or soft bristle brush
- Use Shine weekly to prevent excessive accumulation of debris
- DO NOT use on copper, brass, marble or galvanised surfaces

Subdue

Features

- Prevents and eliminates unsightly foam
- Can be used in swimming pools and spas
- Suitable for use in water features, ornamental ponds, etc.

Pack Size	Carton Quantity	Product Code	Bar Code
500 mL	6 x 500 mL	PC0112	9319737 550056

Formulation

- Cationic Polymer

Application Rates

- 10 ml per 1,000 L of water
- Reapply as often as required to eliminate foaming

Tips

- Similar application rates when used for water features, ornamental ponds, etc.

- Always read the product label and follow directions
- Store all chemical product safely and keep out of reach of children
- Ensure containers are properly sealed after use and stored in a cool, well-ventilated, dry place and away from other.
- Store liquid chemical products away from other household, garden or petroleum chemicals products
- Always use clean containers and utensils for mixing products and dispensing
- Always add the chemical product to water and never add water to chemicals
- Never mix chemicals: mixing different chemicals can cause fuming, fire or explosion to occur
- Always take care when applying chemicals. Ensure that chemical product do not get blown into person applying it
- Never inhale fumes of the products.
- Follow the advice on the product label in the event of an accident
- Carefully dispose of any product spillage as directed on each label

Product: Active: SKU: SKU per Carton: Product Code:	Crystal CLEAR TAB Alumina Salt Tablet 75 g 160 x 75 g PC0092	 9 319737 400313	
Product: Active: SKU: SKU per Carton: Product Code:	Crystal CLARITY Polymeric Cationic Coagulant 1 L 12 x 1 L PC0062	 9 319737 410121	 19319737410128
Product: Active: SKU: SKU per Pallet: Product Code:	Liquid Pool Clarifier Polymeric Cationic Coagulant 20 L 2 x 16 x 20 L PC0207	 9 319737 018006	

	Product	SKU Bar Code	Carton Bar Code
Product: Active: SKU: SKU per Carton: Product Code:	Crystal Express Polymeric Cationic Coagulant 1 L 12 x 1 L PC0065	 9 319737 240018	 19319737240015
Product: Active: SKU: SKU per Pallet: Product Code:	Liquid Pool Flocculant Polymeric Cationic Coagulant 20 L 2 x 16 x 20 L PC0191	 9 319737 002500	
Product: Active: SKU: SKU per Carton: Product Code:	Crystal QUICK Alumina Salt 2 kg 6 x 2 kg PC0066	 9 319737 400207	 19319737800202
Product: SKU: SKU per Pallet: Product Code:	Aluminium Sulphate 20 kg 40 x 20 kg IC0044	 9 319737 250208	
Product: Active: SKU: SKU per Carton: Product Code:	Deluxe Filter Cleaner Sulphamic Acid & Surfactants 1 L 6 x 1 L PC0233	 9 319737 086357	 19319737086354
Product: Active: SKU: SKU per Carton: Product Code:	Eliminate 995 g/kg Organic Acid Complex 2 kg 6 x 2 kg PC0087	 9 319737 530027	 19319737530024
Product: SKU: SKU per Pallet: Product Code:	Citric Acid Monohydrate FG 25 kg 40 x 25 kg PC0015	 9 319737 250031	
Product: Active: SKU: SKU per Carton: Product Code:	Enhance 950 g/kg Sodium Tetraborate 1 kg 10 x 1 kg PC0088	 9 319737 540019	 19319737540016

	Product	SKU Bar Code	Carton Bar Code
Product: Active: SKU: SKU per Carton: Product Code:	Enhance 950 g/kg Sodium Tetraborate 10 kg 1 x 10 kg PC0089	 9 319737 350014	
Product: Active: SKU: SKU per Carton: Product Code:	Citoxal Metal Stain Release Organic Acid Blend 2 kg 8 x 2 kg PC0192	 9 319737 004023	 19319737004020
Product: SKU: SKU per Pallet: Product Code:	Oxalic Acid 25 kg 40 x 25 kg IC0080	 9 319737 250062	
Product: Active: SKU: SKU per Carton: Product Code:	Remove XP 200 g/L Lanthanum Chloride 1 L 12 x 1 L PC0309	 9 319737 001503	 19319737001500
Product: Active: SKU: SKU per Carton: Product Code:	Remove XP 200 g/L Lanthanum Chloride 2.5 L 4 x 2.5 L PC0307	 9 319737 002708	 19319737002705
Product: Active: SKU: SKU per Pallet: Product Code:	Remove XP 200 g/L Lanthanum Chloride 20 L 2 x 16 x 20 L PC0310	 9 319737 002005	
Product: Active: SKU: SKU per Carton: Product Code:	Remove TWO Sodium Thiosulphate 500 g 6 x 500 g PC0081	 9 319737 310056	 19319737800202
Product: Active: SKU: SKU per Carton: Product Code:	Salt Cell Cleaner Inhibited Hydrochloric Acid 1 L 12 x 1L PC0264	 9 319737 534018	 19319737534015

	Product	SKU Bar Code	Carton Bar Code
Product: Active: SKU: SKU per Carton: Product Code:	Salt Cell Cleaner Inhibited Hydrochloric Acid 5 L 4 x 5 LL PC0265	 9 319737 534155	 19319737534152
Product: Active: SKU: SKU per Carton: Product Code:	Pure BromoChloroDimethyl Hydantoin (BCDMH) 1 kg 6 x 1 kg PC0094	 9 319737 700017	 19319737700014
Product: Active: SKU: SKU per Carton: Product Code:	Pure BromoChloroDimethyl Hydantoin (BCDMH) 10 kg 1 x 10 kg PC0311	 9 319737 700116	
Product: Active: SKU: SKU per Carton: Product Code:	AquaFresh IMPACT Sodium Dichloroisocyanuric Acid (SDIC) 1 kg 10 x 1 kg PC0152	 9 319737 015210	 19319737015217
Product: Active: SKU: SKU per Carton: Product Code:	Excite Potassium Peroxymonopersulphate 750 g 12 x 750 g PC0097	 9 319737 300125	 19319737300054
Product: SKU: SKU per Carton: Product Code:	Equalise Complete 1 kg 12 x 1 kg PC0100	 9 319737 001701	 19319737001708
Product: SKU: SKU per Carton: Product Code:	Equalise Complete 2 kg 6 x 2 kg PC0312	 9 319737 002708	 19319737002705
Product: Active: SKU: SKU per Carton: Product Code:	Equalise 100 Sodium Bicarbonate 750 g 12 x 750 g PC0104	 9 319737 490178	 19319737490175

	Product	SKU Bar Code	Carton Bar Code
Product: Active: SKU: SKU per Carton: Product Code:	Equalise 200 Sodium Carbonate 750 g 6 x 750 g PC0105	 9 319737 500020	 19319737500027
Product: Active: SKU: SKU per Carton: Product Code:	Equalise 300 Calcium Chloride 750 g 12 x 750 g PC0108	 9 319737 510012	 19319737510019
Product: Active: SKU: SKU per Carton: Product Code:	Equalise 400 Sodium Bisulphate 750 g 12 x 750 g PC0102	 9 319737 480018	 19319737480015
Product: Active: SKU: SKU per Carton: Product Code:	Embrace Sodium Tetraborate 750 g 6 x 750 g PC0109	 9 319737 530058	 19319737530055
Product: Active: SKU: SKU per Carton: Product Code:	Inhibit Hydroxyethylidene Diphosphonic Acid 500 mL 12 x 500 mL PC0111	 9 319737 540125	 19319737540122
Product: Active: SKU: SKU per Carton: Product Code:	Lustre Cationic Polymer 500 mL 12 x 500 mL PC0114	 9 319737 570122	 19319737570129
Product: Active: SKU: SKU per Carton: Product Code:	Shine Alkaline Salts & Potassium Hydroxide 500 mL 6 x 500 mL PC0059	 9 319737 200159	 19319737200156
Product: Active: SKU: SKU per Carton: Product Code:	Subdue Silicone derivative 500 mL 6 x 500 mL PC0112	 9 319737 550056	 19319737550053
